3. Features

The ROVE R2-4K Dual Dash Cam is equipped with advanced features to provide comprehensive recording and enhanced driving safety:

- **4K Dual Recording:** Simultaneously records 4K 2160P front and 1080P rear footage for total protection.

- **Sony STARVIS 2 Image Sensor:** Captures minute details even in low-light conditions, ensuring superior night vision.
- **Fast 5G WiFi:** Experience blazing-fast 20MBps download speeds for quick footage transfer to your mobile device.
- **Included 128GB microSD Card:** Ample storage for your recordings right out of the box. Supports up to 1TB.
- **24-HR Auto-trigger Parking Mode:** Automatically activates parking mode or motion detection when using the ROVE Ultimate 3-Lead Type-C Hardwire Kit.
- **CPL Filter:** Enhances image quality by reducing glare and reflections, improving color saturation and contrast.
- **Built-in GPS:** Records precise location and speed data directly into your video footage.
- **G-Sensor:** Built-in three-axis impact G-sensor activates upon collision to lock video evidence.
- **Supercapacitor:** Provides enhanced durability and withstands extreme temperatures, offering longer product life and improved safety.
- **Seamless Loop Recording:** Continuously records, automatically deleting the oldest files when the memory card is full.
- **Voice Guidance:** Provides important fail-safe voice feedback and alerts, such as parking mode activation.
- **OTA Firmware Updates:** Free firmware updates via the ROVE App using a 5G WiFi connection.

Why ROVE R2-4K DUAL is 2025's Most Advanced & Value Packed Dash Cam

	ROVE R2-4K DUAL	Other DUAL Channel Dash Cams
1	 **ROVE Uses SONY STARVIS 2 SENSOR:** **SONY**'s most advanced **2nd GEN IMX675** sensor captures the smallest details even more clearer than before, day or night.	Others offer Generic or Low-Quality Sensor Struggles in low light and produces poor video quality. They don't even advertise which brand sensor they use.
2	 ROVE's & Amazon's very first - **FASTEST** WiFi Transfer Speed - up to **20 MBPS**. -> At this time only ROVE offers this advanced technology.	Others provide speed anywhere between 2 to 7 mbps only.
3	 Every ROVE R2-4K DUAL includes a FREE **128GB ROVE PRO microSD card**. Supports up to **1TB** max. -> Only ROVE offers this storage capacity up to 1TB at this point.	Others typically include low speed card only 32GB or 64GB.
4	 **OTA** (Over The Air) Free Firmware Updates via the ROVE App for effortless updates and new features.	Others offer download from website, transfer to memory card, install — time-consuming & full of hassle.
5	 Built-in **GPS** records precise location and speed data along with date and time directly into the video.	Optional/less accurate which has built-in / on mount, takes extra space.
6	 **3"** Wide Screen IPS Display, Sleek Design with User Friendly Beautiful Software, Easy Installation, and Setup. You will feel the difference with ROVE.	Often lacks user-friendly features, complex installation and setup process.

The ROVE R2-4K DUAL sets a new standard in the dash cam industry for 2025. With advanced features such as the SONY STARVIS 2 sensor, the fastest download speed of 20MB/s, a complimentary 128GB ROVE PRO microSD Card, and many more exceptional benefits, this dash cam exemplifies the commitment to excellence, high standards, and reliable products you can trust from an American company.

4. Setup

Follow these steps for a successful installation of your ROVE R2-4K Dual Dash Cam:

1. **Prepare the Windshield:** Clean the area where the dash cam will be mounted. Apply the electrostatic film to the desired location on the windshield for both front and rear cameras.

2. **Mount Front Camera:** Attach the front dash cam to the passenger side of your windshield using the suction mount. Ensure it does not obstruct your view.
3. **Mount Rear Camera:** Apply the electrostatic film to the rear windshield and attach the rear camera.
4. **Connect Rear Camera Cable:** Connect the 6.5M USB Type-C rear camera cable to the rear camera and route it discreetly along the roof liner or panels to the front camera. Use the provided cable clips and car wiring tools to secure the cable.
5. **Power Up:** Plug the 12FT Type-C USB power cable into the front dash cam and then into the dual USB car charger. Insert the car charger into your vehicle's cigarette lighter socket. Alternatively, use the ROVE Ultimate 3-Lead Type-C Hardwire Kit for 24-hour parking mode functionality (professional installation recommended for hardwire kit).
6. **Adjust Camera Angle:** Loosen the screw on the suction mount to adjust the front camera's view angle. Rotate the camera 360° to record any direction you prefer. Adjust and rotate the rear camera view according to your preferred direction. Tighten the screw to lock the angle.
7. **Insert MicroSD Card:** Ensure the included 128GB ROVE PRO microSD card is properly inserted into the designated slot on the dash cam.

5. Operating Instructions

5.1 Basic Operation

- **Automatic Recording:** The dash cam will automatically power on and begin recording when your vehicle's

ignition is turned on.

- **Manual Recording:** Press the 'OK' button to manually start or stop recording.
- **Screen Display:** The 3-inch IPS display shows live footage from both cameras. You can switch between front, rear, or picture-in-picture views.
- **Menu Navigation:** Use the 'MENU' button to access settings and the arrow buttons to navigate. Press 'OK' to confirm selections.

5.2 Advanced Features

- **Parking Mode:** If the hardwire kit is installed, the dash cam will automatically enter parking mode when the car is turned off. It can detect motion or collision and record accordingly.
- **Emergency Lock:** The built-in G-sensor detects sudden impacts or collisions and automatically locks the current video segment to prevent it from being overwritten. You can also manually lock footage by pressing the emergency lock button.
- **Loop Recording:** Footage is recorded in continuous loops (e.g., 1, 3, or 5-minute segments). When the memory card is full, the oldest unlocked files are automatically overwritten.
- **Wi-Fi Connectivity & ROVE App:** Download the ROVE App on your smartphone (iOS/Android). Connect to the dash cam's Wi-Fi network (5G/2.4GHz) to:
  - View live video feed.
  - Manage camera settings.
  - Play back recorded footage.
  - Download videos directly to your phone.
  - Share footage easily with social media or insurance agencies.
- **Firmware Updates (OTA):** The ROVE App facilitates Over-The-Air (OTA) firmware updates, ensuring your dash cam always has the latest features and improvements.
- **GPS Playback:** Use the ROVE Dash Cam GPS Player software on your PC/Mac to view recordings along with GPS logs and G-Sensor data.

6. Maintenance

- **Cleaning:** Use a soft, dry cloth to clean the camera lens and screen. For stubborn smudges, use the provided wet cleaning pads. Avoid harsh chemicals.
- **MicroSD Card Care:** Regularly format the microSD card (at least once a month) within the dash cam's settings to maintain optimal performance and prevent data corruption. Use only high-quality, compatible microSD cards (ROVE PRO or ROVE Ultimate recommended).
- **Temperature:** Avoid exposing the dash cam to extreme temperatures for prolonged periods. The supercapacitor design helps with temperature resilience, but prolonged direct sunlight in a hot car can still affect longevity.

7. Troubleshooting

If you encounter issues with your ROVE R2-4K Dual Dash Cam, refer to the following common problems and

solutions:

Problem	Possible Cause	Solution
Dash cam does not power on.	No power supply; loose connection.	Check the car charger connection to the cigarette lighter socket and the dash cam. Ensure the vehicle's ignition is on.
Recording stops unexpectedly.	Full or corrupted microSD card; power interruption.	Format the microSD card. Check power connections. Use a high-quality microSD card.
Video footage is blurry or unclear.	Dirty lens; protective film still on lens; incorrect focus.	Clean the lens. Remove any protective film. Ensure the CPL filter is clean and correctly installed.
Wi-Fi connection issues.	Incorrect password; too far from device; app issues.	Ensure correct Wi-Fi password. Stay within close proximity to the dash cam. Restart the app and dash cam.
Dash cam freezes or crashes.	Software glitch; memory card issue.	Press and hold the power button to force restart. Format or replace the microSD card. Check for firmware updates.

8. Specifications

Feature	Detail
Model Name	R2-4K
Video Capture Resolution	4K (Front), 1080P (Rear)
Connectivity Technology	Wi-Fi (5G + 2.4GHz Dual Band)
Special Feature	Motion Sensing, GPS, G-Sensor
Included Components	Hardwire Kit, CPL Filter, 128GB microSD Card
Mounting Type	Windshield Mount (Suction & 3M Sticky)
Color	Black
Manufacturer	ROVE
Vehicle Service Type	Car

9. Warranty and Support

Your ROVE R2-4K Dual Dash Cam and Hardwire Kit are backed by a full, hassle-free **1-YEAR WARRANTY**.
For any questions, technical assistance, or to resolve arising issues, please contact ROVE customer care. You can text for a faster response or email their customer care team.
Additionally, the product is eligible for a **30-day refund/replacement return policy** from the date of purchase, as

per Amazon's standard return policy.
For the latest information, firmware updates, and support resources, please visit the official ROVE website or contact their customer service directly.
